1. Introduction

This guide explains, in plain and simple language, how to manage the WhatsApp Business account for Vakharia Airtech Pvt. Ltd. inside Meta's WhatsApp Manager. It is written so that anyone — even someone who has never used Meta Business Suite before — can follow along and complete each task correctly.

1.1 Purpose of this guide

This document covers four things end to end:

- How to log in and find your way around Meta Business Suite and WhatsApp Manager, starting from a blank browser.
- How to add a new team member and give them the right level of WhatsApp access.
- How to view, understand, and manage the templates that already exist.
- How to create a brand-new WhatsApp message template, from the first click to final approval.

1.2 Who should use this guide

This guide is written for non-technical team members at Vakharia Airtech who need to manage WhatsApp Business access or create approved WhatsApp message templates — for example, staff in customer support, marketing, or operations who have been given (or need to request) access to WhatsApp Manager. No coding or technical background is required.

2. Getting Started — Logging In From Scratch

This section starts from a completely blank browser window and walks you all the way to the WhatsApp Manager home screen. Follow every step in order the first time — once you have done it a few times, it will only take a few seconds.

2.1 Step 1: Open the correct website

1. Open any web browser on your computer (Google Chrome or Microsoft Edge work best).
2. Click on the address bar at the very top of the browser window (where website addresses are typed).
3. Type the following address exactly: `business.facebook.com`
4. Press the Enter key on your keyboard.

TIP

You can also reach the same destination by typing business.facebook.com/wa/manage directly — this takes you straight into WhatsApp Manager once you are logged in, skipping the Business Settings screen.

2.2 Step 2: Log in with your Meta / Facebook account

1. On the login page, enter the email address or mobile number that is registered to your Meta account.
2. Enter your password in the password field.
3. Click the blue Log In button.
4. If you have two-factor authentication (2FA) turned on, you will be asked for a 6-digit code. Open your authenticator app or SMS messages, find the code, type it in, and click Continue.

IMPORTANT

You must use a Meta / Facebook login that has already been added as a user on the Vakharia Airtech Pvt. Ltd. business portfolio. If you log in with a personal account that has no connection to Vakharia Airtech, you will not see the business or its WhatsApp account. If this happens, ask your admin to invite you first — see Section 4.

2.3 Step 3: Confirm you are in the correct business portfolio

After logging in, you will land on the Meta Business Suite or Business Settings home screen.

1. Look at the top-left corner of the screen.
2. Confirm it shows the business name: Vakharia Airtech Pvt. Ltd.
3. If a different company name appears instead, click on the business name to open the switcher, then choose Vakharia Airtech Pvt. Ltd. from the list.

WARNING

If you skip this check and a different business is selected, every action you take afterwards — adding users, viewing templates, creating templates — will happen on the wrong account. Always confirm the business name first.

2.4 Step 4: Open WhatsApp Manager

There are two ways to reach WhatsApp Manager. Either one works — use whichever is faster for you.

Option 1: Through Business Settings (recommended for first-time users)

1. In the left-hand menu, click Accounts to expand it, then click WhatsApp accounts.
2. From the list in the middle of the screen, click Vakharia Airtech.
3. A summary panel opens on the right showing business information, account status, and payment details.
4. Click the WhatsApp Manager button near the bottom-right of that panel.

Figure 1: Business Settings > Accounts > WhatsApp accounts, with the Vakharia Airtech WhatsApp account selected from the list.

Figure 2: The account summary panel — confirm Verified business and Approved status, then click the WhatsApp Manager button to launch the tool.

Option 2: Direct link (fastest, once you are familiar)

1. Type `business.facebook.com/wa/manage` into the address bar and press Enter.
2. In the top-right corner of the page, click the account drop-down.
3. Select Vakharia Airtech from the list (do not select “Test WhatsApp Business Account” unless you are intentionally testing something).

NOTE

Whichever option you use, always check the account name shown in the top-right corner of WhatsApp Manager before doing anything else. Every section from here onward assumes you are inside the Vakharia Airtech WhatsApp account.

3. Your WhatsApp Business Account at a Glance

Before making any changes, it helps to know what a healthy, correctly configured account looks like. The table below records the verified state of the Vakharia Airtech WhatsApp Business Account at the time this guide was written. Use it as a reference point — if any of these values look different when you check, investigate before proceeding (see Section 10, Troubleshooting).

Item	Current value
Business portfolio	Vakharia Airtech Pvt. Ltd.
WhatsApp account name	Vakharia Airtech
WhatsApp Business Account ID (WABA ID)	1568163707846136
Business verification	Verified
Account status	Approved
Currency / Time zone	INR / Asia/Kolkata
Phone number	+91 84118 80724
Phone number status	Connected
Quality rating	High
Example test template	testbyyash — Marketing — English — Body: “Hello” — Status: In review

Figure 3: WhatsApp Manager > Phone numbers — the Vakharia Airtech number shows Connected status and a High quality rating.

TIP

Check the Phone numbers screen (Account tools > Phone numbers inside WhatsApp Manager) any time message delivery seems unusually low. A drop in quality rating from High to Medium or Low is often the first sign that a template or sending pattern needs attention.

4. Adding a New User to WhatsApp Manager

SIMPLE EXPLANATION

Adding a user has two separate parts. Part A adds the person to the Vakharia Airtech business portfolio (so Meta knows who they are). Part B gives that person permission to use the WhatsApp account specifically. Both parts are required — doing only Part A means the person can log in but will not see WhatsApp Manager at all.

4.1 Part A — Add the person to the business portfolio

1. Log in and open Meta Business Settings (see Section 2).
2. Check that the selected business portfolio is Vakharia Airtech Pvt. Ltd. (top-left corner).
3. In the left menu, click Users to expand it, then click People.
4. Click the Add or Invite people button, near the top-right of the screen.
5. In the box that appears, type the person's work email address. Double-check the spelling carefully — a typo means the invite goes to the wrong inbox.
6. Click Next.
7. Choose the correct role: select Employee for normal staff, giving only the access they need. Select Admin only when explicitly approved by management, since Admins can manage other users and sensitive settings.
8. Click Invite to send the invitation.
9. Tell the person to check their email inbox (and spam/junk folder) for an invitation from Meta, and click Accept Invite. They will need a personal Facebook account to accept — if they do not have one, they must create one first using their work email address.

TIP

If the person already appears under Users > People, do not add them again — skip straight to Part B and assign their WhatsApp access.

4.2 Part B — Give the person access to the WhatsApp account

1. In Meta Business Settings, click Accounts in the left menu, then click WhatsApp accounts.
2. Select Vakharia Airtech from the list.
3. Click the Assign access button near the top-right of the summary panel.
4. Choose the person you want to add from the list that appears (they must already be added in Part A to show up here).
5. Select the specific WhatsApp permissions they need (see the permission table below).
Give Full control only to users who must manage settings, templates, phone numbers, and access for other people.
6. Click Assign or Save to finish.
7. Ask the person to refresh (or fully log out and log back into) Meta Business Suite / WhatsApp Manager and confirm they can now see the Vakharia Airtech WhatsApp account in the account drop-down.

Figure 4: Accounts > WhatsApp accounts — select Vakharia Airtech, then click Assign access to grant a person WhatsApp permissions.

Permission area	Give access when the user needs to...
Basic access	View the WhatsApp account and related business details only.
Manage templates	Create, edit, submit, archive, or delete message templates.
Manage phone numbers	View or manage the connected WhatsApp phone number.
Manage account / settings	Change account settings, payment configuration, data sharing, or business settings.

Permission area	Give access when the user needs to...
Full control / admin	Manage other users and sensitive account settings. Use carefully — only for trusted admins.

IMPORTANT

If a user cannot see templates after access has been assigned, ask them to fully log out and log back in. Also confirm they have selected the Vakharia Airtech WhatsApp account from the account drop-down — not a different account they may also have access to.

5. Viewing and Managing Existing Templates

SIMPLE EXPLANATION

Templates are pre-approved messages that can be sent through WhatsApp. You can view every template — active, in review, or rejected — from WhatsApp Manager under Message templates.

5.1 Step-by-step: opening the template list

1. Open WhatsApp Manager (see Section 2.4).
2. Confirm the account drop-down at the top-right shows Vakharia Airttech.
3. In the left menu, click Message templates to expand it, then click Manage templates.
4. Use the Search box to find a specific template by name.
5. Use the Category, Language, Status, and Date filters above the list when the template list is long.
6. Read across the table columns to understand each template: Template name, Category, Language, Status, Messages delivered, Read rate, Top blocks, and Last edited.
7. Only click the checkbox next to a template when you need to take a specific action, such as Delete, Archive, or Unarchive.

WhatsApp Manager > Message templates

Vakharia Airttech Give feedback

Sharing your WhatsApp Cloud API message event data can help improve the performance of marketing messages with optimisations and Meta ads. This includes data on messages read, replies and delivery status. You can manage this setting at any time in [Meta business settings](#). Data shared using this feature is subject to the [Meta Business Tool Terms](#). [Learn more about data sharing](#)

Figure 5: WhatsApp Manager > Message templates > Manage templates — the existing, active templates for Vakharia Airttech.

5.2 Understanding each column

Column name	Meaning in simple words
Template name	The internal name used to identify the template.
Category	The purpose of the template — Marketing, Utility, or Authentication.
Language	The language selected for the template.
Status	Approval and quality status. Active templates can be used right away; In review means Meta is still checking it.
Messages delivered	How many messages were delivered using the template in the selected time period.
Read rate	How many delivered messages were opened/read, shown as a percentage.
Top blocks	If shown, helps identify templates that customers are blocking.
Last edited	Date the template was last changed.

5.3 Current templates for Vakharia Airtech

Template	Category	Language	Status / notes
service_resolution	Utility	English (US)	Active — used for service messages.
service_register	Utility	English (US)	Active — registration / service message.
complaint_resolution_	Utility	English (US)	Active — complaint resolution message.
testbyyash	Marketing	English	In review. Body preview: “Hello”.

Figure 7: Selecting a template's checkbox reveals the *Delete*, *Archive*, and *Unarchive* actions. Do not click these unless the action is required.

WARNING

Deleting or archiving a template cannot easily be undone, and an Active template may already be in use by automated messages or agents. Never select a template's checkbox and click Delete/Archive unless you are certain it is no longer needed.

6. Creating a New WhatsApp Template — Complete Walkthrough

SIMPLE EXPLANATION

A new template is a message format that Meta reviews before it can be used to message customers. After you submit it, the status will show In review. Wait until the status changes to Active before relying on it for real customer communication.

6.1 Step 1 — Start template creation

1. Log in and open WhatsApp Manager for Vakharia Airtech (see Section 2).
2. In the left menu, click Message templates, then click Manage templates.
3. Confirm the top-right account selector shows Vakharia Airtech.
4. Click the blue Create Template button on the right, just above the template list.

Figure 8: From Manage templates, click the blue Create Template button on the right to begin.

6.2 Step 2 — Choose the template category

The “Set up your template” screen has three tabs at the top — Marketing, Utility, and Authentication — followed by a list of message types.

1. Click the tab that matches your message’s purpose — Marketing (offers, promotions, engagement), Utility (order, complaint, service or registration updates), or Authentication (OTP / login codes only). The full comparison table is right after these steps if you need help deciding.

- Below the tabs, choose the message type that fits: Default (a normal message with optional media and buttons), Catalogue (links to your product catalogue), Flows (forms, surveys, or appointment requests), Order details (lets customers pay), or Calling permissions request (asks if you may call the customer).
- Watch the live Template preview panel on the right — it updates automatically as you choose options.
- Click Next, at the bottom-right of the screen.

Figure 9: The Set up template screen — Marketing is selected as the category, with Default chosen as the message type.

Category	Use it for	Example
Marketing	Promotions, offers, awareness, customer engagement, reminders that may be promotional.	New product announcement, service campaign, discount offer.
Utility	Important customer service updates connected to an action or request.	Service registration, complaint resolution, order status update.
Authentication	Security and verification messages only.	OTP or login verification code.

Marketing type	Use this when...
Default	You want a normal marketing message with optional media and buttons.
Catalogue	You want to send customers to the product catalogue.
Flows	You want customers to fill a form, survey, appointment request, or interest form.

Marketing type	Use this when...
Order details	You want to send a message through which customers can pay.
Calling permissions request	You want to ask customers whether you can call them on WhatsApp.

6.3 Step 3 — Add name, language, and content

1. Template name and language: type a template name using lowercase letters, numbers, and underscores only — no spaces. Example: `service_follow_up` or `installation_offer_june`.
2. Select the language from the Select language drop-down. English is used in the example screenshots.
3. Type of variable: choose Number (the most common option) unless you have a specific reason to choose otherwise. Variables are only needed when some text changes for each customer, such as a customer's name, date, ticket number, or amount.
4. Media sample: leave this set to None if the template has no image, video, or document. Only change it if your message needs a media header.
5. Header (optional): add a short title or media at the top only if needed — leave it blank otherwise.
6. Body (required): write the main message clearly and keep it short. Insert `{{1}}`, `{{2}}`, and so on exactly where personalised text should appear.
7. Footer (optional): add a short closing note, such as “Thanks, Team Vakharia Airtech.”
8. Buttons (optional): add a button only when the customer needs to open a link, make a call, or send a quick reply.
9. If Meta asks for sample values for your variables, provide realistic examples (for instance `{{1}}` = “Raj”, `{{2}}` = “TCK1234”) so the reviewer understands the context.
10. Check the Template preview panel on the right side — read it exactly as a customer would, before moving on.

Figure 10: The Edit template screen — add the template name, language, variable type, media sample, header, body, footer, and buttons here.

Field	What to enter	Example
Template name	Internal template name. Keep it simple and meaningful.	testbyyash, service_resolution, complaint_resolution
Language	Message language.	English
Header	Optional title/media. Leave blank if not needed.	Service Update
Body	Main message. This is the most important part.	Hello {{1}}, your service request {{2}} has been resolved.
Variables	Use only when customer-specific details change.	{{1}} = customer name, {{2}} = ticket number
Footer	Optional small note at the bottom.	Thank you, Vakharia Airttech
Buttons	Optional action buttons.	Call now, Visit website, Quick reply

6.4 Step 4 — Review and submit

1. Read the preview on the right side exactly the way a customer would read it on their phone.
2. Check spelling, grammar, punctuation, phone numbers, and links carefully.
3. Make sure the message content actually matches the category you selected in Step 2 (a mismatch is a common reason for rejection).
4. Make sure every variable has a clear sample value, if Meta has asked for one.
5. Click Submit for Review.
6. Wait for Meta to review the template. Status will show In review until the review is complete — this usually takes anywhere from a few minutes to 24 hours, occasionally longer.
7. Once approved, the status changes to Active and the template becomes available for sending real messages.

Figure 11: After submission, the new template appears in the Manage templates list with status In review, until Meta finishes checking it.

7. Best Practices for Faster Template Approval

Following these habits will reduce rejections and keep your phone number's quality rating High.

- Write messages in simple, polite language.
- Do not write misleading offers or unclear promises.
- Use the correct category — selecting the wrong one can cause rejection or delivery issues later.
- Keep promotional content under Marketing and service/customer updates under Utility.
- Avoid unnecessary links. Only include a link when the customer genuinely needs to open it.
- Do not overload a message with variables — too many placeholders can make it unclear to Meta's reviewers.
- Always provide proper sample values for variables when Meta asks for them.
- Check the preview panel before submitting — it is the easiest way to catch mistakes early.
- Never delete or archive an Active template unless you are certain it is no longer needed.

Good template example	Why it is good
Hello {{1}}, your service request {{2}} has been completed. If you need more help, please reply to this message. Thank you, Vakharia Airttech.	Clear, polite, short, and directly related to customer service.
Dear {{1}}, your registration for {{2}} has been received. Our team will contact you shortly.	A useful customer update that is easy to understand.

7.1 Common mistakes to avoid

Avoid this	Reason
Too many offers, emojis, or repeated words.	May look like spam and reduce approval chances or quality rating.
Wrong category, such as Utility for a discount offer.	Meta may reject it, or reclassify the template later.
Unclear variable use, such as "Hello {{1}} {{2}} {{3}}."	The reviewer may not understand what the message means.
Very long messages.	Customers may not read them in full, and approval can take longer.

8. Troubleshooting Guide

If something does not work as expected, find the closest matching problem below before asking for help.

Problem	What to do
User cannot see WhatsApp Manager.	Check that the user accepted the email invite and has been assigned access to the Vakharia Airtech WhatsApp account (see Section 4).
User can open WhatsApp Manager but cannot create templates.	Check their WhatsApp account permissions — they likely need “Manage templates” access assigned.
Wrong WhatsApp account is showing.	Use the account drop-down at the top-right and select Vakharia Airtech.
Submit for Review button is disabled (greyed out).	Check that the template name, language, body, and any required sample values are all filled in.
Template is stuck “In review” for a long time.	Wait for Meta’s review to complete. Do not create duplicate templates immediately unless it is urgent and approved internally.
Template was rejected.	Read the rejection reason shown in WhatsApp Manager, correct the category or content, and submit again.
An existing template was accidentally selected (checkbox ticked).	Click the checkbox again to uncheck it, unless you genuinely need to Delete, Archive, or Unarchive that template.
Cannot log in to business.facebook.com at all.	Confirm you are using the correct email/phone and password. Use “Forgotten password” if needed, and confirm 2FA codes are entered before they expire.
Quality rating drops from High to Medium or Low.	Review recent templates and sending volume. Pause non-essential marketing sends, and check the Phone numbers screen (Section 3) regularly until it recovers.

9. Final Checklist Before Submitting a New Template

Go through this list one last time, right before clicking Submit for Review:

- ☐ Correct WhatsApp account selected: Vakharia Airtech.
- ☐ Correct category selected: Marketing, Utility, or Authentication.
- ☐ Template name uses lowercase letters and underscores only — no spaces.
- ☐ Language is correct.
- ☐ Body message is complete and easy to understand.
- ☐ Variables are used only where required and have a clear, obvious meaning.
- ☐ Preview on the right-hand side looks correct.
- ☐ Links, phone numbers, and spelling have all been checked.
- ☐ Submit for Review is clicked only after every item above has been confirmed.

10. Quick Reference — Process Flow Table

Once you are comfortable with the full steps in this guide, use this single table as a fast lookup.

Need to...	Go here	Main action
Log in for the first time	business.facebook.com	Enter your Meta login, confirm Vakharia Airtech Pvt. Ltd. is selected.
Add a user	Business Settings > Users > People	Invite the person, then assign WhatsApp account access.
Give WhatsApp access	Business Settings > Accounts > WhatsApp accounts	Select Vakharia Airtech and click Assign access.
Check phone number	WhatsApp Manager > Account tools > Phone numbers	Confirm +91 84118 80724 is Connected and quality is High.
View templates	WhatsApp Manager > Message templates > Manage templates	Search, filter, and review existing templates.
Create a template	Manage templates > Create Template	Select category, add content, preview, and submit.
Check new template status	Manage templates list	Look for In review or Active status.

11. Glossary of Terms

Plain-language explanations of every technical term used in this guide.

Term	What it means
Meta Business Suite / Business Settings	The web dashboard (business.facebook.com) where you manage all of a company's Meta tools — Pages, Ad accounts, WhatsApp, Users, and more.
Business Portfolio	The umbrella account holding all of a company's Meta assets. Ours is "Vakharia Airttech Pvt. Ltd."
WhatsApp Business Account (WABA)	The official WhatsApp account connected to the business inside Meta, identified by a unique ID number (ours is 1568163707846136).
WhatsApp Manager	The dedicated tool inside Meta Business Suite used to manage templates, phone numbers, and messaging settings.
Message Template	A pre-written, Meta-approved message format that can be sent to customers on WhatsApp. Every template must be approved before use.
Category	The purpose label on a template: Marketing, Utility, or Authentication.
Variable / Placeholder	Text inside double curly braces, such as {{1}}, that changes for each customer — for example, their name or order number.
Quality Rating	A score (High, Medium, or Low) Meta gives a phone number based on how customers respond to its messages.
Messaging Limit	The maximum number of new customers a number can message within 24 hours; it grows as the number builds trust.
Status (Active / In review / Rejected)	Shows where a template currently stands in Meta's approval process.
Admin access	Full control over a business asset, including managing other users' access. Assign carefully.
Employee access	Limited access assigned for specific tasks only, such as template management.
Two-Factor Authentication (2FA)	An extra login security step — usually a one-time code sent by SMS or generated by an authenticator app.
Read rate	The percentage of delivered messages that customers actually opened.
Top blocks	An indicator showing whether customers are blocking the number after receiving a particular template.
